VisionMark Graphics - Tested Tough!

For over 61 years, VisionMark has designed and built permanent graphic solutions for service in severe environments and difficult applications. This experience provides our staff with the tools and insights necessary to solve your toughest problems. We can provide recommendations for materials, adhesive systems, proof testing, and manufacturing methods to satisfy the most demanding specifications and uses.

No matter what the environment, even the most difficult, our membrane switches, switch and panel overlays, safety, identification, and directional labels:

- *stand up against repeated exposure to fluids, cleanings, and abrasion medical equipment sees*
- *repel the dirt and grime in which power tools work*
- *resist the high temperatures on pump panels at the fire scene*
- *prevent UV yellowing in lawn & garden equipment labeling*
- *tolerate solvents, acids, and bases often found near pumping systems.*

You can count on VisionMark to provide the printed electronics and product identification tough enough to last.

VisionMark Graphics - Proven Tough!

Call your VisionMark field representative or our customer service staff to learn how VisionMark can solve your tough problems.

VisionMark provides a full library of tough constructions registered to UL® 969, UL® 299, and CSA standards. In addition, we provide tough labeling that complies with NFPA®1901 and ANSI® Z535.
