

An ISO 9001:2008 Registered Company

Engineered Graphics for the Medical Industry

No matter what the environment, even the most difficult, our membrane switches, graphic overlays, safety, identification, and directional labels resist the repeated exposure to body fluids, cleanings, and abrasion.

You can count on VisionMark to provide the printed electronics and product identification tough enough to last.

Our engineering staff works with ANSI[®], NFPA[®], FDA, and many other industry and proprietary requirements. In addition to being a UL[®] Authorized Label Supplier, we also carry a full line of UL[®] and CSA[®] recognized constructions. Our Quality Management System is registered to the ISO 9001:2008 standard.

Finally, VisionMark has the infrastructure and experience to support supply chain management systems and lean manufacturing environments.
