

## > *Your Single Source Supplier*

Most of our customers require a variety of different engineered graphics, from durable labeling and brand identification, to membrane switch overlays and encapsulated RFID labels. Over our sixty-four year history we have invested in the right technologies and capabilities to support these varied needs.

Today, VisionMark continues to produce traditional etched metal products while also designing and manufacturing graphics in:

- Polycarbonates
- Polyesters
- Other high performance polymers
- High performance adhesive systems.

### *Our capabilities now include:*

- Precision screen printing
- Hot stamp printing
- Flexo printing
- Digital printing
- Digital die cutting
- Class A and steel rule die cutting
- Many other finishing options.

### *We also design and manufacture specialty labeling:*

- UL & CSA registered label constructions for difficult applications
- UL 299 labeling for fire extinguishers
- Encapsulated RFID labeling
- Custom sequentially numbered and bar coded labels.

### *What can we do for you?*

Our staff has the resources and experience to tackle all your engineered graphics needs.
